Wow the person that was allways there for me and our jets is there no more. This is a shock and a loss. Lorna was very cool and direct in her fun way with anything at all – even during those crisis situations -it was allways that fun personality, toying with us first, then down to business. I loved her style and will miss that. She could be serious and fun and that just made working with her something to look forward to with every call. I like what Chris Columbus said – you will be remembered. Love you, Rest in peace.

When I came to AA in 2008, Lorna took me under her wing as a "mother" and a dear friend. She saw something special in me and spent many hours with me and taught me so very much of her knowledge. Though I nor anyone else will have that 38 years of Lorna knowledge we will always remember the time we had and was able to cherish with such a wonderful soul. I will miss you Lorna and so will many others but you will never be forgotten. To the family, I offer my prayers and condolences.

Goodbye Friend. We never met but knew each other well, so well in fact when we called each other we both knew what it was about and got right into it. Cannot thank you enough for the work you did for AA and myself as a station manager. I miss your "crystal ball" telling us what can and cannot be done regarding A/C routing and workload. God Bless you to eternity and sincere condolences to your family and friends as they say goodbye.your friend forever,Devon Erriah- JFK
